

FOR IMMEDIATE RELEASE

Rover Technology Fusions Announces Contract with Xcel Energy for the Implementation of RoverINK

(Tampa, FL – March 23, 2010) – Rover Technology Fusions, a Tampa based mobile-data capture, workflow and document management solutions provider, has announced they have entered into a contract with Xcel Energy, one of this nation’s leading combination natural gas and electric utilities.

“Xcel Energy has been consistently on the forefront of mobile data technologies and is noted for their innovation, customer service, as well as being good stewards of our natural resources. After a successful test of RoverINK last year, which demonstrated compatibility with their MDT’s, infrastructure, and the ability to automatically update the Asset Management System, Passport via the EAI platform, I am very excited about the pending implementation” stated Robert Letzeisen, Executive Vice President at Rover. “Their team has been nothing less than a true customer partner in this relationship and clearly demonstrates a consistent theme of internal cooperation between business objectives and technology decisions” he went on to say. “As the RoverINK technology will help support internal quality and compliance initiatives. We believe this is a significant statement about our products as Xcel Energy’s field personnel took us to task to prove the value, the usability at the point of service, as well as RoverINK’s ability to enforce business defined best practices and data quality standards at Xcel Energy” he further commented.

When asked about the project, Don Emmot, Senior Manager Business Systems stated “This technology will provide significant improvements in the way our technicians capture and validate data related to tracking and repairing gas leaks. It will also simplify data gathering activities and allow us to report more complete and timelier information to our regulatory agencies. The business management team and technicians are already looking for additional ways to use this technology.”

Contract terms and conditions are confidential.

About Rover Technology Fusions

Tampa, Florida based Rover Technology Fusions (Rover) is a leading full-service technology solutions provider offering a robust portfolio of workflow and mobile-data products to a broad range of customers. Focused on improving operational efficiency through the use of digital writing technology, Rover INK delivers ‘speed on the edge’ of the enterprise resulting in the elimination of costs associated with forms processing.
